Monkey Tricks.

Anecdotes without end are told o feats and intelligence of the lower ani in line, as the inner door could only be mals, but very few careful experiments son at a time. If it were kept open they can really do. In this direction Dr. E. L. Thorndike of Columbian uni versity, says Popular Science Monthly seems to have done the best work. He has published experiments showing that dogs, cats and chicks not only de not reason, but only learn, as it were by chance. They cannot be really taught even the smallest tricks. He thinks that monkeys may be included with man in a special mental geniu owing especially to their enjoyment of physical and mental activity. They cannot, however, learn by seeing othe put through the movements. In spit of the common notion to the contrary they do not really imitate.

This royal "double" is a cook in a London restaurant, and the duke has on more than one occasion paid a visit to his "likeness."

Just before leaving for Australia his royal highness jocularly remarked to the king: "I do not think, sir, that I, as a whole, am leaving England. Part of the duke will be cooking away; part will be cooking at home."

When the Duke of York first heard of his wonderful "double," he expressed a wish to see the gentleman who resembled him so marvelously.

"I hope you do not mind being so very like me?" said his royal highness amiably to his "double," the cook, expecting naturally some polite if not flattering reply.

The French chef, however, who, poor man, had had his life made miserable highness, exclaimed vehemently, almost fiercely: "Mind! Mind! Ah, it is ze curse of ze life to me. I 'ave ze face of a prince, but, ah, I 'ave not ze flat-

A Fatal Flower.

Many Alpine accidents are due to the eagerness of tourists as well as natives to get specimens of edelweiss and other rare flowers that grow in dangerous places. Professor Karl Odorfer of Pressburg is one of the latest victims of this folly. With some friends he was making the ascent from Veldese of a peak 4,500 feet high, when he saw some edelwelss flowers at the edge of a precipice. He stooped to pick them. He slipped, exclaimed joeularly, "Hopla!" and tried to seize a bush. He missed it, however, and fell down 1,500 feet into an abyss, where his body was found in a terribly mutilated condition.

Ganjah Smoking.

A demand is being made in Jamaica for the suppression of the practice of ganjah smoking among the many thousands of East Indian coolies who work on the banana and sugar plantations throughout the colony. Ganjah is a variant of Indian hemp or bhang, which was employed to arouse the fierce passions of the rebel sepoys durng the Indian mutiny, and which tolay is responsible in the east for many eases of running amuck. The cooly who smokes this most pernicious weed freely becomes an incarnate fiend with the most homicidal tendercies.
